

STRUCTURED SOFTWARE TEST PLANNING

Testimonials from Past SSTP Participants

“Very valuable. I enjoyed the interactive quizzes...not too much pressure due to the helpful highlighting tips and open book.”

“Very helpful. This class should be required for all QA people.”

“I have a better understanding of how to test and the different methods. The manual will be very beneficial to use as a reference!”

“By far the best training seminar I’ve attended. From my team’s added knowledge and understanding, I’m convinced my ROI will be through the roof!”

“Instructors were professional and not only displayed a thorough understanding of the course material, but also an awareness of ‘real world’ issues related to software development and testing.”

“Fantastic and knowledgeable instructor with firm grip of subject matter! Ton of experience in the field.”

“The training is very valuable to QA professionals. I think everyone in QA should take this course.”

“Great presentation and lectures. The subject matter is very relevant to my daily tasks.”

“Breadth, depth and organization of the material are exactly what we expected. The presentation was handled very well while encouraging and promoting interaction from the audience.”

“I’m relatively new to managing the software QA function. I gained a better understanding of testing mechanics and roles.”

“I’m pleased with the information shared in the seminar. The presenters were very knowledgeable and pleasant. It made for a good learning experience. Thank you very much.”
